PainCare one of Top 100 firms

Tuesday, September 13, 2011

SOMERSWORTH — PainCare was named one of New Hampshire's Top 100 Private Companies by Business NH Magazine in its September 2011 issue. Business NH Magazine surveys thousands of companies each year and ranks them by gross revenue for the previous year.

Considering the current state of the economy, it is impressive that 60% of the companies on the Top 100 list have had growth in revenue, while so many other companies' revenues are decreasing.

In addition to being one of the Top 100 Private Companies, PainCare was named number 15 on the list of the 20 Fastest Growing Companies on the Private 100, and it was the only health care practice on the Fastest Growing list. PainCare was established in 1992, and since 2008 has opened numerous satellite offices throughout New Hampshire in addition to its original Somersworth location (1992) and Merrimack location (1998). Now with 9 locations throughout the state, PainCare is able to serve the pain management needs of multiple communities, bringing care to the people, and improving New Hampshire's overall quality of life.
